DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, 44-63 and 71-77, drawn to a fuel cell stack assembly and sub-assembly, classified in class 429, subclass 32.
- II. Claims 24-35 and 78-81, drawn to a fuel cell stack assembly, classified in class 429, subclass 38.
- III. Claims 36-43 and 82-86, drawn to a fuel cell stack assembly, classified in class 429, subclass 39.
- IV. Claims 64-70 and 87-90, drawn to a fuel cell stack assembly, classified in class 429, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions different designs and features. Invention I requires registration posts with different shapes, Invention II requires registration posts with a length limitation, Invention III requires flow field plates configured to receive two

registration posts and Invention IV requires registration recesses to be molded into a surface of the flow field plates.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
